JAVA SOFTWARE DEVELOPMENT

Enthusiastic and driven 2nd-year B.Tech student specializing in Artificial Intelligence and Data Science. Possesses a strong foundational knowledge of Java programming, Object-Oriented Programming (OOPs), and relational databases like SQL. Eager to leverage algorithmic thinking and technical problem-solving skills as a Java Developer Intern within a collaborative software engineering team.

KEY COMPETENCIES

Core Java Programming | Object-Oriented Programming (OOPs) | Data Structures & Algorithms (DSA) | Relational Databases (SQL) | HTML & CSS | Problem-Solving | Analytical Thinking | Collaborative Teamwork

PROFESSIONAL EXPERIENCE

BlueStock.in

Software Development Engineer Intern

- Developed and optimized application modules using core Java programming methodologies to improve system reliability.
- Collaborated with cross-functional team members to analyze project requirements and write clean, maintainable code structures.
- Participated in code reviews, bug fixing, and troubleshooting activities to resolve system bottlenecks.

BlueStock.in

Data Analyst Intern

- Utilized SQL queries to extract, manipulate, and analyze structured datasets for business insights.
- Cleaned and preprocessed raw data using Python libraries to ensure data integrity and accurate reporting.
- Generated analytical summaries to support project management and data-driven decision-making processes.

EDUCATION & CERTIFICATIONS

Bachelor of Technology (B.Tech)

Majors: Artificial Intelligence & Data Science (2nd Year)

Chameli Devi Group of Institutions, Indore

Senior Secondary (12th Grade)

Vedansh International School | Percentage: 68.8%

Secondary (10th Grade)

Vedansh International School | Percentage: 74.4%

PROJECTS

BeanByte Coffee Shop Application

- Developed a full-stack responsive web application utilizing Java, HTML, CSS, and relational databases.
- Implemented Object-Oriented Programming (OOPs) design patterns to structure clean and maintainable backend logic.
- Configured dynamic user interfaces and connected frontend modules with the database to handle secure order management.

ADDITIONAL TECHNICAL SKILLS & TOOLS

- Development Tools & IDEs: IntelliJ IDEA, Eclipse, VS Code, Git, GitHub
- Databases & Querying: MySQL, PostgreSQL
- Cloud & Operations: Google Cloud Platform (GCP) Console, Linux Basics

TECHNICAL COURSEWORK & ACADEMICS

- Object-Oriented Programming (OOPs) in Java
- Data Structures and Algorithms (DSA)
- Database Management Systems (DBMS)
- Python for Data Science & Machine Learning

CERTIFICATIONS & LICENSES

- Google Cloud Certified (Arcade)
Issued by Google Cloud | Cloud Infrastructure and Machine Learning Milestones Completed.
- Agnivira Internship Certificate
Professional Industry Competency and Technical Training Endorsement.
Core Java Programming Foundations
- Academic Certification for Advanced Object-Oriented Logic and Programming Excellence.
Virtual Mouse Workshop Certificate – Geeks of Gurukul
- Successfully completed the Virtual Mouse Workshop
focused on computer vision and human-computer interaction concepts.
